HOKOLITE

Light that keeps you going

Portable lighting for everyday use

Original design
Thoughtful engineering
Dependable product quality

COMPANY INTRODUCTION

Design, Development & Manufacturing

HOKOLITE at a glance

15 years

Portable LED lighting experience

Around 30

Self-developed new products each year

Over 200

Worldwide Patent

Based in Ningbo, China

Ningbo Asia Leader Imp & Exp Co., Ltd.
Ningbo Yinzhou Adelante Lighting Co., Ltd
Original design and managed partner manufacturing

COMPANY PROFILE

HOKOLITE specializes in innovative portable lighting. As a professional manufacturer and exporter, we provide high-quality lighting solutions worldwide.

Our products include LED headlamps, work lights, portable lanterns, night lights, bike lights, and spotlights. We offer full OEM/ODM services for branding, colors, manuals, and packaging.

Innovation drives us. Our R&D team follows a forward-looking roadmap, launch ing market-responsive products and holding over 200 patents.
Backed by a professional supply chain, we guarantee on-time delivery and stable logistics.
Partner with us for :

- Original design
- Rigorous QC
- Efficient logistics
- E-commerce support
- Professional visuals

Join us as a strategic partner in portable lighting and experience quality and innovation. Contact us for custom solutions. Based in Ningbo, China, we serve the global market — your trusted partner in personal lighting

HOKOLITE
Light that keeps you going

Portable lighting for work, home and the outdoors

Work & DIY

Work lights
Inspection lights

Hands-free use

Headlamps
Clip-on lights

Outdoor use

Camping lights
Portable spotlights

Everyday use

EDC flashlights
Motion sensor lights

A clear use case gives every product a reason to earn its place in the range.

Flexible ways to build a lighting range

OEM product programs

Established platforms with brand identity, packaging and product adaptations.

ODM product development

Original concepts shaped by user needs, product positioning and engineering requirements.

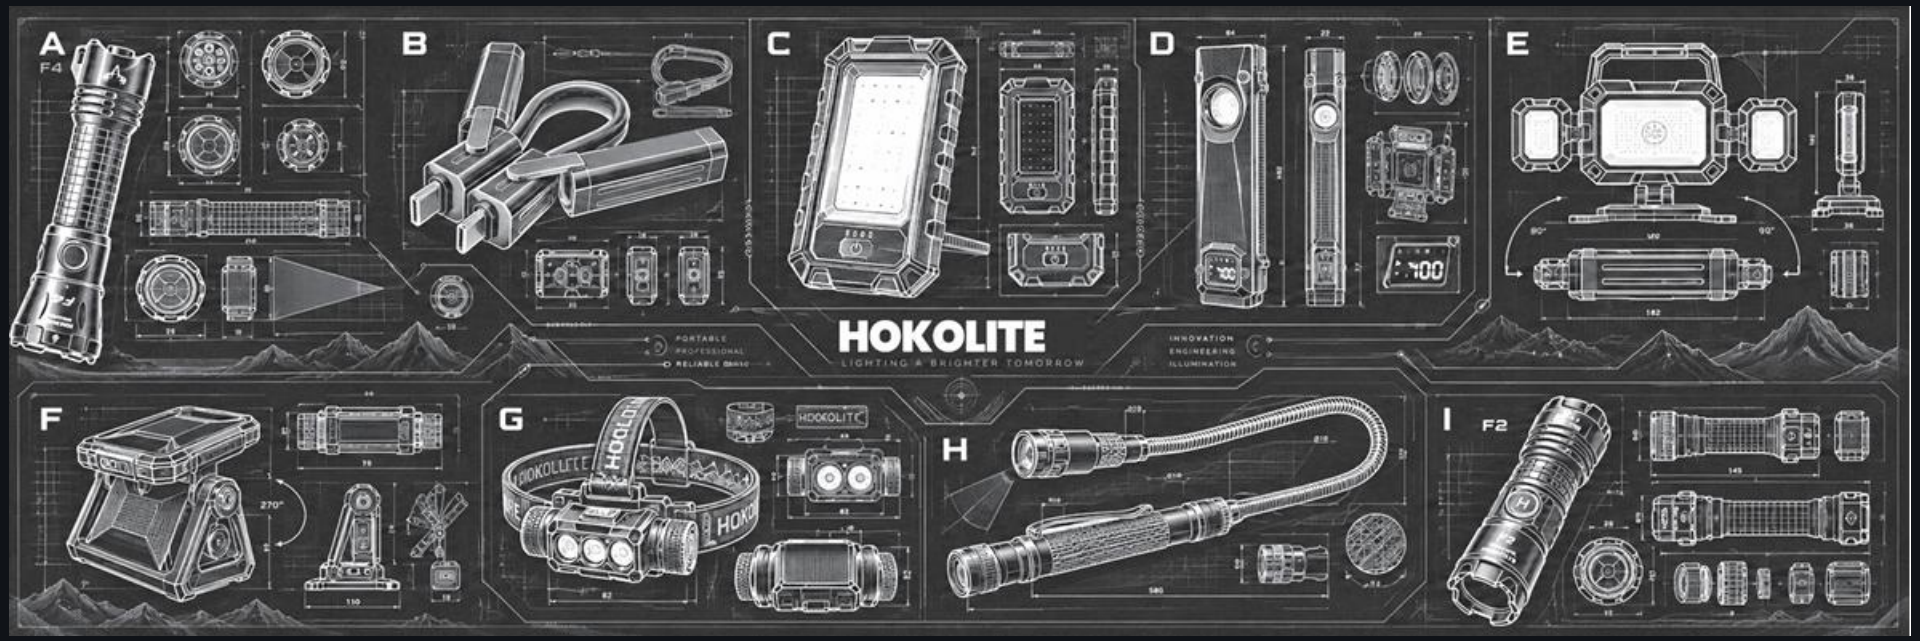

HOKOLITE brand distribution

A coordinated portable lighting range for suitable markets and sales channels.

Design rights, tooling ownership and channel arrangements follow the agreed program.

Cooperation starts with a product and commercial model that fits the business.

A team connecting product design and production

Product managers & designers

User insights guide appearance, ergonomics, controls and product family styling.

Engineering collaboration

Mechanical, electronic and optical decisions support achievable performance.

Packaging & quality review

Instructions, product markings and acceptance criteria match the finished product.

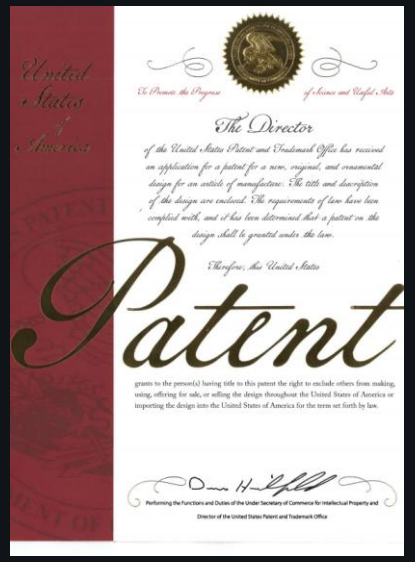

HOKOLITE
Light that keeps you going

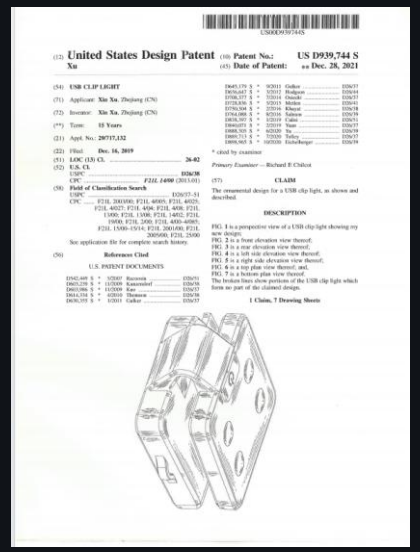

Original design and a distinct product identity

Distinctive where it matters

Recognizable product form
Intuitive interaction
Consistent family styling
Clear brand presentation

Product-specific design rights and market availability receive review.

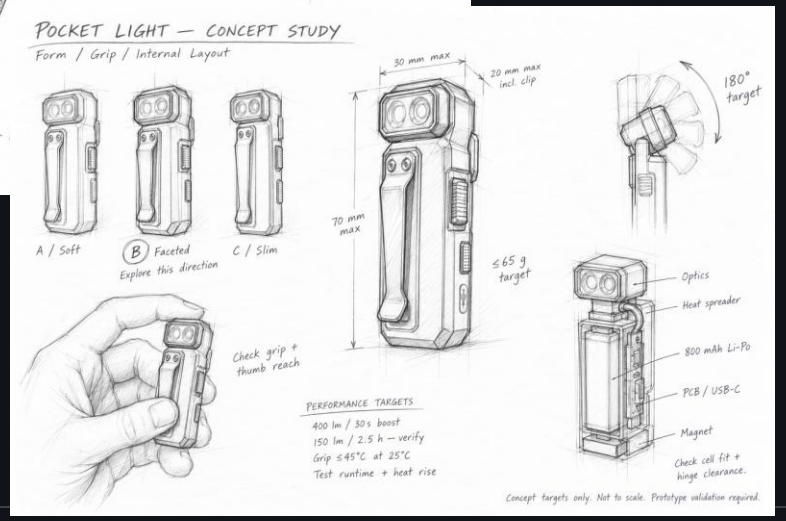

Selected patent and design documents

HOKOLITE
Light that keeps you going

Design philosophy grounded in everyday life

Real needs before extra features

Every feature should solve a recognizable problem in use.

Useful performance in balance

Output, runtime, size and durability work together.

Good design within reach

Thoughtful engineering and sourcing keep the focus on practical value.

Better everyday use gives the product a clearer benefit to explain and sell.

ODM Design Process

HOKOLITE
Light that keeps you going

Product development from research to launch

01 User insights & competitive research

Repeated problems and improvement opportunities

02 Product definition

Users, use cases, performance and target cost

03 Concept sketches & feasibility

Form, internal layout and practical constraints

04 Industrial & mechanical design

Ergonomics, sealing, assembly and thermal design

05 Electronics & control validation

Modes, status feedback, charging and protection

06 Prototyping & engineering validation

Fit, function, performance and durability

07 Color, branding & product markings

Finish, logos, function icons and legibility

08 Packaging & benefit communication

Clear selling points, instructions and protection

09 Pilot production & prelaunch review

Field trials, consistency checks and corrections

10 Production & launch support

Sales materials, feedback and product updates

HOKOLITE
Light that keeps you going

Manufacturing resources with clear accountability

HOKOLITE manages

Product definition and original design
Supplier selection and review
Product and acceptance standards
Project coordination and quality oversight

Production partners provide

Relevant tooling and production processes
Component sourcing and assembly
Process checks and product testing
Production planning and packing

One approved specification connects development, production and acceptance.

Production planning starts with an approved reference

01 Approved product reference

Drawings, BOM, sample, artwork and inspection criteria

02 Material and process readiness

Critical components, tooling status and assembly requirements

03 Assembly and verification

Functional, battery and relevant reliability checks

04 Packing and release

Accessories, labels, cartons and shipment approval

Order quantity, production capacity and delivery dates receive product-specific review.

HOKOLITE
Light that keeps you going

Quality focuses on what the customer will experience

Performance that supports the label

Lumen output, beam performance and runtime checks.

Battery and everyday reliability

Charging, capacity, standby current and relevant durability tests.

Evidence behind acceptance

Defined criteria, inspection records and product-specific test documents.

Manufacturing & Quality

Scan to Watch

Clear approvals support predictable delivery

Before production

Specifications, reference samples, artwork and inspection requirements receive approval.

During production

Milestone reviews identify open decisions and material or schedule risks.

Before shipment

Inspection results, packing details and export documents support release.

After delivery

Service feedback supports corrective action and preparation for future orders.

Purchasing and QC teams work from the same product and approval record.

Sales feedback becomes the next product improvement

01 **Listen after launch**

Retail questions, user feedback and service issues

02 **Identify the cause**

Product behavior, instructions, packaging or expectations

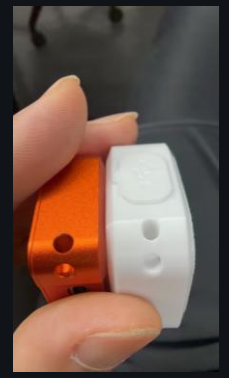

03 **Make a focused change**

Design, engineering and quality review the improvement

04 **Verify the next version**

Retesting and updated sales or usage materials

A connected feedback loop supports more useful products and clearer sales communication.

Hong Kong Electronics Fair

Direct conversations about product needs

Hands-on product reviews bring handling, light output and operating details into the discussion. Buyer feedback helps identify the next development opportunity.

HOKOLITE
Light that keeps you going

Canton Fair

A broad range, reviewed in person

Work lights, headlamps and outdoor lighting can be compared together, making it easier to discuss assortment, product requirements and supply planning.

HOKOLITE
Light that keeps you going

Chicago Housewares Exhibition

Products presented with a retail purpose

Coordinated packaging, product displays and demonstrations make practical benefits easier to assess for a retail range.

HOKOLITE
Light that keeps you going

OEM customer references across Europe

OEM customer references around the world(USA/Japan/Australia)

A clear starting point for the next lighting range

01 **A defined commercial goal**

Market, channel, target price and the customer need.

02 **A focused product review**

Selected products, samples and practical evaluation.

03 **An agreed program**

Specifications, quotation, quantities, approval criteria and schedule.

Useful products. Clear benefits.
A foundation for lasting cooperation.
